Who we are

We know and love databases

We are a team of software and database developers with 20+ years of experience with SQL Server and Oracle database design,

development & maintenance. We worked with transa
ems, ERP/CRM, web applications and data wareh
third party and our own. In many projects in which we participated, we lacked proper documentation, communication and effective transfer of knowledge which led us to development of Dataedo – the tool we were always missing.
