Lahm

The Lahman Baseball Database, created by SABR member Sean Lahman, contains complete major league batting and pitching statistics back to 1871, plus fielding statistics, standings, t stats, managerial records, postseason data, and mo cluding the Negro Leagues!

Check out stories, photos, and highlights from the 2026 conference.

LEARN MORE

The Lahm tabase allow chers to perform complex queries across the entire history of the game. The Lahman Database has served as the foundation for many popular baseball research projects and simulation games, including Out of the Park Baseball and Baseball Mogul.

The updated Lahman Database is now available for download below. Thanks to Bryan Walko for his efforts to produce this annual update.

Download latest version (stats from 1871-2025 seasons, including Negro Leagues statistics):

- SQL version
- Microsoft Access version
- Comma-delimited version

Version 2025, released January 2, 2026
Byte order markers updated for some CSV files on February 18, 2026

This database contains complete batting and pitching statistics from 1871 to 2025, plus fielding statistics, standings, team stats, managerial records, postseason data, and more. For more details on the latest release, please **read the documentation**. Contact lahmandb@sabr.org with any questions or corrections.

Negro Leagues data, licensed from Seamheads.com, includes major leagues and teams from the late 19th century through the 1948 Negro American and National League

seasons. The players and teams included in the database follow recommendations established by SABR's Negro Leagues Task Force (2021) and Negro Leagues and Teams Special Committee (2024), for seasons where full statistics are available from Seamheads.

The Lahman Database can be used on any platform, but please be aware that this is not a standalone application. It is a database that requires Microsoft Access or some other relational database software to be useful.
